

CHART 8515

Stream No. 9 (2 notices) S. E. end Port Chalmers.

Clear water.

Is 20 feet wide and 6 inches deep and is full of chums.

Has all fine gravel bottom and wide places in it inside the grass banks. It splits up into several parts. Fish in some places are up it 2,000 feet above the grass banks. High tides go up about 300 or 400 feet.

August 11, 1925.....no estimate, but lots of fish then.

August 24, 1926.....14,900 live fish and 7,000 dead. Nearly all chums. Just a few in glacier stream.

September 7, 1927.....30,000 fish.

September 30, 1928.....30,000.

September 14, 1929.....75,000, 90% chums.

September 5, 1930.....46,000, 90% chums.
